2.6 Other models	45
2.7 Defining targets	46
3 Factors that influence pronunciation	51
3.1 Our mother tongue	51
3.1.1 The phoneme: A psycholinguistic reality	52
3.1.2 Contrastive Analysis (CA)	55
3.1.3 Markedness	58
3.1.4 More recent approaches to transfer research	59
3.2 Biological factors	62
3.2.1 Age	62
3.2.2 Sex	63
3.2.3 Aptitude/Gift	64
3.3 Motivation	65
3.4 Other factors	66

4	Methods and tools	69
4.1	Recording learners' speech	72
4.2	Phonetic transcription	75
4.3	Visual aids	77
4.4	Minimal pairs	78
4.5	Drill	80
4.6	Authentic material	81
4.7	Out-of-class activities	84
4.8	Feedback and correction	87
4.9	Technology: Using corpora	88
4.10	Games, poems etc.	90

Specific problems

5	Specific problems 1: Differences in the phonemic inventory	95
5.1	The dental fricatives [θ] and [ð]	97
5.2	The labial-velar approximant [w]	102
5.3	The TRAP vowel [æ]	104

7.2	Intonation	147
7.3	Rhythm	154
7.4	Phonotactics	157
7.5	Articulatory Settings	159

8	Specific problems 4: Other causes	163
8.1	Differences in sound-letter correspondence (spelling)	163
8.2	Differences in morphophonology	173
8.3	Individual lexemes ('Hard Words')	176
8.4	Realizational differences	180
8.5	Teaching priorities: What matters most?	190

Empirical work

9	Working with empirical data	195
9.1	Data collection	195
9.2	Coding the recordings	206
9.3	Analysing the results	214
9.4	Further observations	217
9.5	Doing your own research project	219
	Key to the 'reflections'	223
